Mae brogaod a llyffantod yn dechrau eu bywydau fel grïfft ac wedyn yn deor yn benbyliaid. Maent yn tyfu'n gyflym ac wedyn yn datblygu coesau nes iddynt droi yn fersiynau bach o'r oedolion - metamorffosis yw'r enw ar hyn.

Frogs and Toads start out as spawn then hatch into tadpoles. They quickly grow bigger then grow legs until they are turned into little versions of the adults - this is called metamorphosis.

Rwy'n wahanol i frogaod oherwydd bod gen i groen sydd â golwg ddafadennog, llygaid lliw efydd a choesau byrrach. Nid oes gen i unrhyw ddannedd felly rydw i'n llyncu fy mwyd yn gyfan - gwllithod a mwydod yw fy ffefrynnau.

I am different from frogs because I have warty looking skin, bronze eyes and shorter legs. I don't have any teeth so I swallow my food whole - I like to eat slugs and worms.

Ein hoff fyrbryd yw pryfed, malwod a gwllithod. Rydym yn chwilio am fan i guddio yn yr hydref ac yn cysgu yno tan y gwanwyn.

Tadpoles, insects, snails and slugs are our favourite snacks. In the autumn we like to find somewhere to hide and then sleep there until spring.

Rydw i'n nofio ben i waered o dan arwyneb y dŵr. Weithiau dwi'n edrych yn arian oherwydd bod aer yn cael ei ddal yn y gwrych ar fy nghorff. Allwch chi weld fy llygaid mawr coch?

I swim upside-down under the surface of the water. Sometimes I look silvery because air is trapped in the bristles on my body. Can you see my large red eyes?

Malwoden sy'n byw yn y dŵr ydw i. Rydw i'r un siâp â chorn hwrdd. Rydw i'n llyfu algâu oddi ar greigiau gyda fy nhafod garw. Allwch chi weld y llinellau rydw i'n eu gwneud wrth i mi symud?

I am a snail that lives in the water. I am the same shape as the horn of a ram. I lick algae off rocks with my rough tongue. Can you see the lines I make as I move?

MALWODEN CORN MAHAREN

RAMSHORN SNAIL

Make rubbing of the Water scorpion here

Efallai fy mod i'n edrych fel sgorpion ond pryf dyfrdrig ydw i mewn gwirionedd. Rydw i'n ysglyfaethwr sy'n cuddio i ymosod ar rywbeth fel penbwl wrth iddo fynd heibio.

I may look like a scorpion but I am actually an aquatic bug. I'm an ambush predator waiting until something like a tadpole comes past then I pounce on it.
